RQ2
Hybrid agent > reference control
Hybrid agent > matched control
Hybrid agent > network without replication
Hybrid agent > classical twin
RQ3
Hybrid agent, $R = 32$ > no reuse
Classical twin, $R = 16$ > no reuse
PPO reference control, $R = 4$ > $R = 1$
Depth $L = 2$ > $L = 1$
Depth $L = 5$ > $L = 2$
Entangled > unentangled, no reuse
Entangled > unentangled, $R = 32$
RQ4
CartPole ceiling > unentangled circuit
Scalar ceiling > scalar circuit, $L = 10$
Binary entangled > unentangled
Binary entangled > linear ceiling
RQ5
Binary circuit, $L = 5$ > $L = 1$
Binary circuit > network on bits (58)
Binary circuit > one-hot network (5,508)
